**DETAILED ACTION*****Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-12 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims of U.S. Patent No. 6,780,399 B2. Although the conflicting claims are not identical, they are not patentably distinct from each other because the examined claims are either anticipated by, or would have been obvious over, the reference claims. Here claims 1-12 are generic to all that is recited in claims of U.S. Patent No. 6,780,399 B2. That is, claims of U.S. Patent No. 6,780,399 B2 fall entirely within the scope of claims 1-12, or in other words, claims 1-12 are anticipated by claims of U.S. Patent No. 6,780,399 B2. Specifically, the compositions for delivery and the method of producing the said compositions of instant claims 1-12 are anticipated by compositions for delivery and the method of producing the said compositions of claims 1-14 of the reference claims.

Art Unit: 1616

Claims 1-6 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 13-23 of copending Application No. 10/813, 492. Although the conflicting claims are not identical, they are not patentably distinct from each other because the examined claims are either anticipated by, or would have been obvious over, the reference claims. Here claims 1-6 are generic to all that is recited in claims 13-23 of copending Application No. 10/816, 492. That is, claims of copending Application No. 10/816, 492 fall entirely within the scope of claims 13-23, or in other words, claims 1-6 are anticipated by claims 13-23 of copending Application No. 10/816, 492. Specifically, the compositions for delivery recited in instant claims 1-6 are obvious over claims 13-14 (the method of administering the composition) and over claims 15-23 (the kit comprising a composition and a device for delivering the composition) of the copending Application No. 10/816, 492.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
